

An Alkaline Pre-Spray for Heavily Soiled Areas

Traffic Spotter Pre-Spray Treatment is the ideal pre-spray for heavily soiled areas. Its unique formulation makes it effective for use on both oil and water-based soil, and spots. **Traffic Spotter Pre-Spray** Treatment will speed up any cleaning method by attacking the hard to remove soil from heavily trafficked areas. **Traffic Spotter** can also be added to your cleaning solution by pre-spraying the diluted product on the carpeted area first, and letting it dwell for 10 to 15 minutes (do not allow to dry). The dwell time will help improve its lifting effectiveness. Traffic Spotter has been used by professional carpet cleaners for years.

Key Features of Traffic Spotter Pre-Spray

- Helps improve cleaning
- Alkaline Ready-To-Use pH 9-10 Pre-Spray

Traffic Spotter Pre-Spray

Traffic Spotter Pre-Spray

Diluted pH 9-10

Gallon 4 case

C330-005

5 Gallon each

C330-003

DIRECTIONS: Shake well before using.

Test fabric in inconspicuous place for color fastness before using.

1. Dilute 6-8 oz. (180-240 mL) of **Pre-Spray** to 1 gallon (3.78 L) of warm water.
2. Spray heavily soiled areas using a sprayer or an airless pressure sprayer. Use a medium to coarse spray, never a mist or fogger.

NOTE: A mist filter mask should be worn during spray applications.

3. Agitate into carpet with a carpet rake.
4. Allow to dwell in carpet for 10-20 minutes to help break down dirt. Do not allow to dry to carpet fibers.
5. Proceed to clean the carpet in the usual manner.

NOTE: Freezing will not affect cleaning power. Thaw, shake well and use.
