

Controls Foam Residue Left in Carpets from Previous Cleanings

Granular Defoamer is an easy and economical way to help prevent and eliminate foam build-up left in carpeting from excess detergent left in carpeting from the previous cleaning.

Highly concentrated **Defoamer** will quickly dissolve in water, and should alone be used when and where necessary. **Defoamer** can be used with all portable or truck-mounted hot water extraction equipment.

Defoamer will help keep nozzle, hose, and recovery tanks free of foam build-up. Eliminating foam before it gets to the recovery tank, helps extend portable unit vacuum motor life. Granular Defoamer is easy to apply.

Key Features of Granular Defoamer

- Eliminates foam build-up from previous cleaning
- Saves labor and time
- Easy to apply, will not cake or clump up
- Dissolves easily in water

Granular Defoamer

	8 lb. 4/case	50 lb. each
Granular Defoamer (Powder)	C285-003	C-285-005

Diluted pH 6-7.5

DIRECTIONS:

Test fabric in inconspicuous place for color fastness before using.

TO PREPARE STOCK SOLUTION:

1. Sprinkle a few tablespoons of **Granular Defoamer** lightly over every 100 sq. ft. of carpet. Granular Defoamer can also be added to the recovery tank before cleaning.
2. Proceed with normal cleaning.
