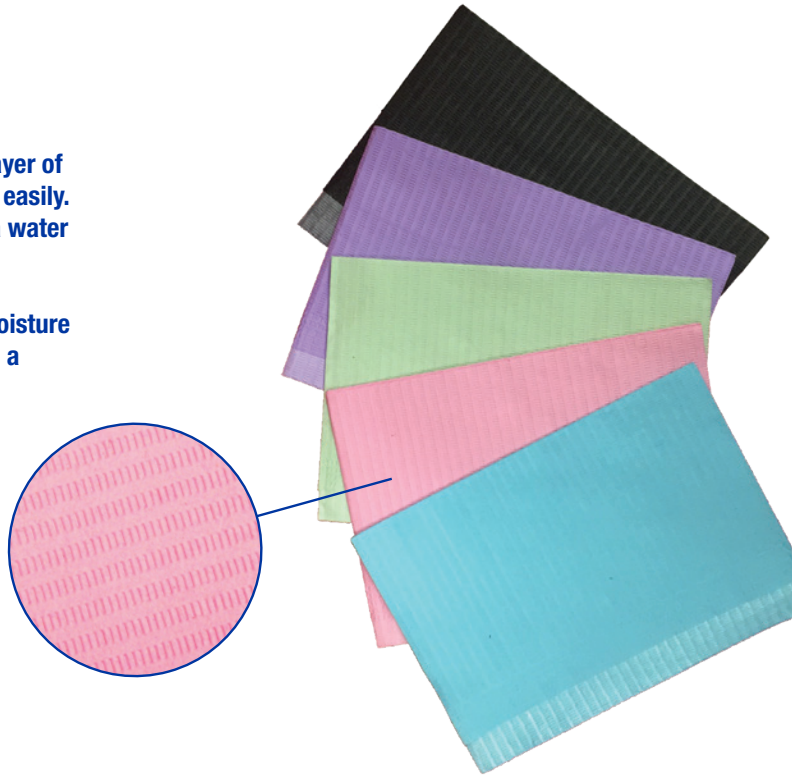
PATIENT BIBS / LAP CLOTHS

Patient Bibs are made of two layers of paper bonded together plus a layer of poly film. They feel soft, yet are enough strong to prevent from tearing easily. The surface absorbs liquid and moisture while the poly film provides a water resistant layer.

The surface has a horizontal embossing that helps prevent liquid or moisture from spreading onto patient's clothing or other surfaces. They come in a variety of colors.



Key Features
- 2 layers of paper + 1 layer of poly film
- Horizontal embossing on surface
- Strong, tear resistant material
- 125 bibs per bag, 4 bags per case

Applications
- Dental
- Healthcare
- Tattoo/Piercing/PMU
- Veterinary
- Mortuary
